

The Star Planet

By A. C. Zito

Have you ever seen anything like it?

The Star Planet

The Star Planet

The Star Planet

I like it

It stays planted in space

But to find it you couldn't trace

But if you find it here's what will be

It is a planet you see

And the stars they do the circling

They spin around the planet

A strange sight on to be landing

A strange sight on to be standing

Have you ever seen anything like it?

The Star Planet

The Star Planet

The Star Planet

I like it

The planet stays seated

In this one place

And is as big as a star

As big as space

And takes so long to go so far

To reach the stars

The stars that are

And the stars that rotate

They rotate around it

The planet that sits

It's the planet you found it

Have you ever seen anything like it?

The Star Planet

The Star Planet

The Star Planet

I like it

It sits

It barely moves

So the oceans must be rude

It's big

It is no fig

So the people are giants

And they carry around their tridents

Have you ever seen anything like it?

The Star Planet

The Star Planet

The Star Planet

I like it

Come visit it one day

You just might like it

The Star Planet

The Star Planet

The Star Planet

I like it
